### **T-400 TAILHOUSING WITH ROLLER BEARING - PG LENGTH**

Part #401936

**NOTE!** This tailhousing requires the OEM output shaft be shortened by .500”.

- 1) Be certain to measure from the end and mark the shaft with a straight line.
- 2) Trim the shaft using an abrasive cut-off wheel. Protective eyewear and face wear must be used!
- 2) Use a file to smooth the cut area, making certain there are no metal burrs on the splines that could get into your driveshaft yoke.
