

727 REAR ROLLER KIT

Part # 725821

PARTS LIST

- Steel Low/Reverse Drum with Bearing
- 4-Bolt Rear Support with Bearing
- Modified Steel Park Gear (Comes with one ring already in the correct position)

Packed by: _____

This kit is to be used with manual shift valve bodies. Call if you are trying to use this kit with retaining automatic shift.

MODIFICATIONS

Need to chamfer this edge to prevent cutting the seal upon installation of the output shaft into the new rear support. A little care is required when assembling.
