STUD KIT - SUPERCASE TO BELL
Part #950263

1. Clean the case holes thoroughly before installing the studs in the case.

2. Using Red Loctite, install 7/16" course thread side of stud into the case with a stud driver or with 2 nuts. Tighten the studs until the threads are flush with the case.

3. Slide the bell over the studs and install one (1) washer and one (1) nut on each stud. Do not use Loctite! Tighten the six (6) nuts to 35 ft/lb in a criss-cross fashion.
