

DEMO CONVERTER RESERVATION FORM

If you would like to try an ATI Torque Converter on your vehicle, please return the completed form to ATI by March 16, 2007. ATI's Technicians will need the following information in order to recommend the correct converter for your application. Please note: In order to test a converter, you must place a charge card, cash or a check on file with ATI for the value of the unit that you are testing. If you do not return this converter to us at the end of the test and tune or if you damage this converter in any way, you will be charged for the unit.

ATI is not guaranteeing that we will have every converter available for every car. We will have as many converters available as possible. Giving ATI adequate time to build a converter for your car is mandatory.

Please note that you are responsible for installing and uninstalling the converter.
