Basic Damper Overhaul - \$85

The basic overhaul consists of a complete damper breakdown. Each part is inspected and cleaned. Hardware and elastomer rings are replaced and the damper is recertified for SFI safety specs. **If your damper is in need of any replacement parts, such as the crank hub, outer shell, inner shell, etc., each part will be replaced at our warehouse distributor price level.**

Is there any specific problem or area of concern with the damper? _____
